This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFATORY REMARKS.

A DESIRE to comply with the suggestions of a few kind friends, who have strongly urged the propriety of giving a certain degree of publicity to the Manuscript-Records relative to Suffolk in the possession of the writer, and have themselves expressed a wish to be made acquainted with their contents, has induced the printing of the present portion of his Catalogue, which he regrets that want of leisure and severe illness in his family forbid his now completing. To some of these friends, he is indeed deeply indebted for favors conferred in the presentation of many most interesting documents; so that their recommendation has had very much the force of a command. He is also happy in the opportunity thus afforded him of making a public declaration of his obligations; and it were idle to deny, that he has been further induced by the promises of new accessions to his stores, when the nature and amount of his collection, and the specific ob-

ject he has had in view in forming it, should be made manifest. In truth, the effect has already been such, that he has to acknowledge the receipt of some deeds and other manuscripts during the short period that the following sheets have been passing through the press. All such will be embodied in the subsequent portion, which it is his full expectation and intention shall be printed in the autumn of the present year.—In the part thus alluded to will be particularised—

1.—A very large collection of early Charters and Grants of Land relative to Suffolk

2.—A list of graphic and pictorial illustrations, engraved portraits and drawings from early painted portraits of persons connected with the county, either by birth, descent, title, marriage, residence, or property; the whole amounting in number to upwards of four thousand, and arranged in thirty quarto-sized portfolios.

3.—An enumeration of several hundred seals, principally of monastic, baronial, municipal, or otherwise official; together with very numerous drawings of British and Norman remains, urns, fibulæ, celts, and other relics of past times, arranged under the places where found.

In conclusion, the writer cannot but entertain the most sanguine hope, that even the mass of materials here

described will be considered of great utility to the historian and antiquary, and more particularly those interested with what relates to Suffolk: indeed, he flatters himself they will be found an important source of information to any one who may hereafter undertake to write the history of this opulent but neglected county. To himself, most cheering has been the past thirty years' occupation, in thus gathering the historical mementos of his native county; and doubly so is it rendered by the reflection, that the pursuit has brought him the acquaintance of many persons, distinguished by their acquirements, their high grade in society, their love of literature, and all that ennobles man. Impressed with these sentiments, he hopes he may be excused for declaring, that the gratification derived from the possession of his collections, and even from the consciousness how much he has saved from oblivion and destruction, becomes almost as nothing, compared to those higher feelings generated by the kindness he has experienced and the friendship with which he has been honored.
